CEO message

Creating a new IT business paradigm as a constant challenge through change and innovation

Daesang Information Technology Since its foundation in 1991, we are leading IT service company that provides reliable IT consulting and optimal solutions to our customers through professional knowledge and abundant technical force.

Having specialized ERP, IT outsourcing, ITSM faculty and solutions, we are building infrastructure to provide integrated services such as database, database linkage solutions, backup recovery, storage with global vendors such as Oracle,Veritas and NetApp etc.

In addition, by building new IT technologies such as Big Data, IoT, cloud, and open source with various business models, we can contribute to creating high value of customers by providing promising solutions that are customer-oriented and can lead the future.

Daesang Information Technology is aimed at the open corporate culture with the continuous development and challenge of each employee. We will be a true partner of our customers with a developing mind. Thank you.
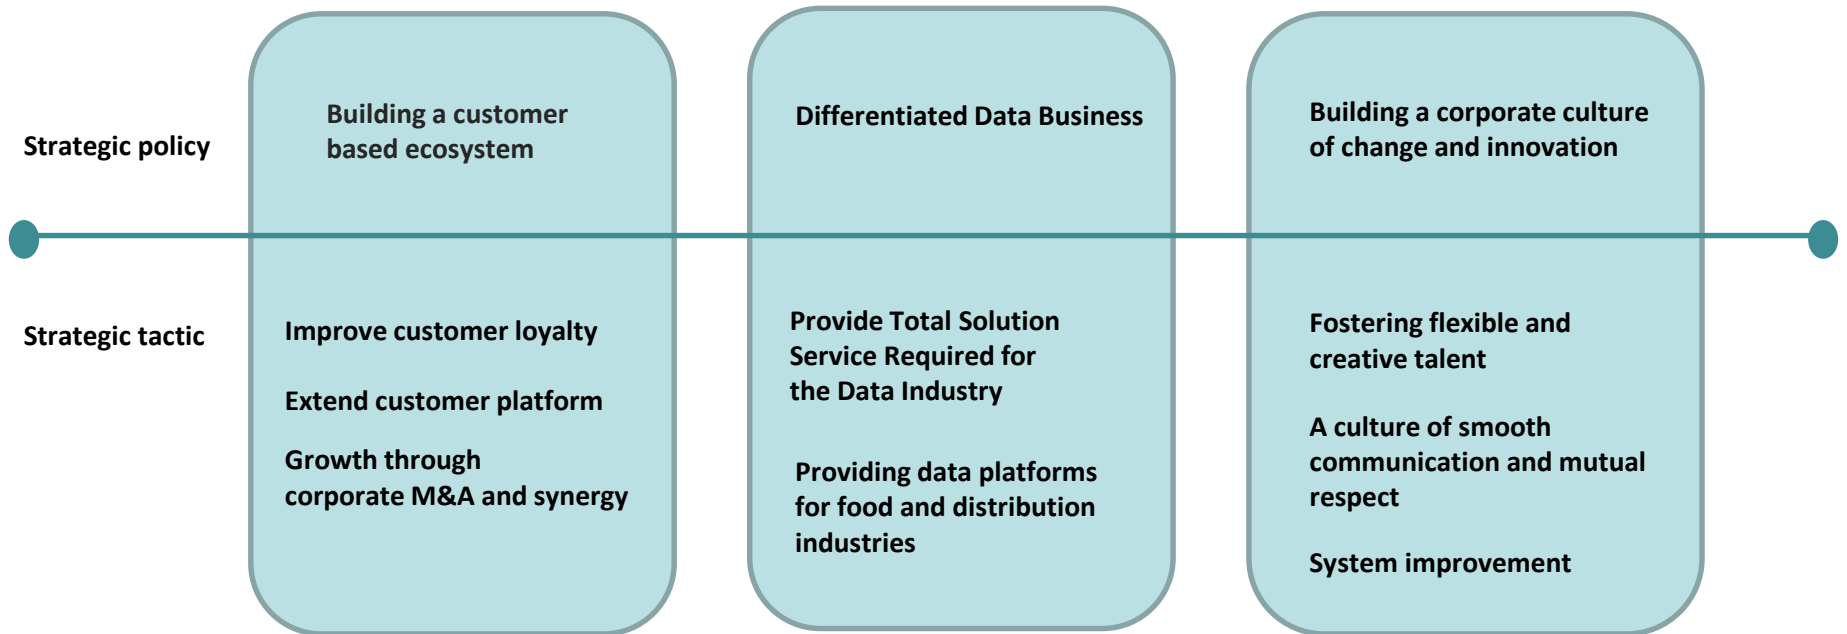

CEO   Seung Hu Oh

Company Overview

Daesang Information Technology is an IT service affiliates of Daesang Group which is a major domestic general food company. Daesang Information Technology has been providing consulting of database,middleware, application, system regarding food and distrubution industry. Also, we have been providing total solution of cloud and mobile which is needed for data industry. Especially, we have been offering professional technical services in the area of data industry with skilled business partners as Oracle, Veritas, Quest, NetApp, Vmware, Jennifersoft etc.

Total ITO
Full outsourcing of IT Service

Selective ITO
Some IT Service outsourcing

Combined Service

SI+ITO
Outsourcing for post-SI operations

ISP+ITO
Consulting and outsourcing for enterprise IT planning

BPO+ITO
Transfer of specific tasks such as accounting, personnel, etc. and carry out related ITO

Biz Type

Sole acquisition
Outsourcing service company alone acquired assets

Joint Venture
Share outsourcing service company and customer share

BTO
Outsourcing service company builds system and transfers it to customers

BOT
Outsourcing service company builds the system and transfers it to the customer after the investment is recovered

Solution Partners

ORACLE

## Integrated Cloud Applications & Platform Services

- **Database** : Database SE2, EE & Options (Database In-Memory, Multitenant, Advanced Security, Partitioning, RAC)

- **Middleware** : WebLogic Server, IDM, Coherence

- **Application** : BI & EPM, Endeca

- **Server & Storage System**

  : SPARC , x86, Fujitsu M10 server, Netra system, All Flash/NAS/SAN Storage & Tape

- **Engineered System**

  : Exadata, ODA, Exalogic, Exalytics, SuperCluster, Private Cloud Appliance, Big Data Appliance, ZDLRA

- **Open Source/Virtualization** : MySQL, Oracle Linux & VM

- **Cloud** : SaaS(HR/ERP/CX/EPM/SCM Cloud), PaaS(Database Cloud, Database Backup Service, Java Cloud, Documents Cloud),

  IaaS(Compute/Storage Cloud)

Solution Partners

VERITAS™

IT'S TIME FOR VERITAS™

As a "Veritas" distributor of applications and platform services for multi-cloud and data protection, it provides solutions for backup and recovery and business continuity.

Solution Partners

Unified storage system & software solution

- NetApp delivers innovative storage and data management solutions that accelerate your business transformation and drive down costs.

- **Storage System**: Flash Storage system (All-Flash FAS, EF series), FAS storage system(FAS8000 series, FAS2500 series), E-Series storage system(E5600, E2700)

- **Software**: Clustered Data ONTAP, NetApp Cloud ONTAP, SANtricity OS, Data ONTAP Edge, OnCommand management software, Data protection software, NetApp FlexArray storage opensource software

- **Solution**: FlexPod, cloud and opensource, backup and recovery, big data

Solution Partners

Virtualization & Cloud Infra. solution

VMware is the global leader in virtualization and cloud infrastructure, delivers customer-proven solutions that accelerate IT by reducing complexity and enabling more flexible, agile service delivery.

True Real-time Application Performance Manager

JENNIFER ensures the performance and availability of enterprise applications by providing 24×7 application monitoring, real-time problem troubleshooting, fast resolution of performance bottleneck, and more in order to maximize application availability and minimize system downtime.

Integrated maintenance management solution

SIMMS is a service that provides customers with A to Z related to maintenance and asset management, MA inspection management, fault management, service request management, work management, One-stop integrated management. Also provides a mobile version to check and request MA check history and fault history in real time.

Business Intelligence Optimization Solution

As a partner in the SAP Application A1, B1 ERP family of products, ERP solutions for real-time business enable you to build and operate an information system for large enterprises and mid- to small-sized industry groups, and have information system suggestions and management experience for a wide range of customers for SAP ERP, so you can experience solutions for making decisions based on your situation.

Solution Partners

Providing Toad

TOAD is a solution proven by database users and experts. It provides efficient quality management of development code, automatic SQL tuning, DB simultaneous connection load simulation using virtual users, simple DB monitoring, and data query and analysis for various DB platform environments.

Improving DB performance

Selfasoft is a company specializing in database performance Management and provides DB performance management solutions recognized not only in Korea but also abroad

Providing data management

Infomatica promotes data-driven digital transformation, It is a leading company in enterprise data management.
